1. Create a new table named **high_salary_employees** containing the structure of employees only (no data). Then, insert all employees from employees whose salary is greater than 12,000 into this table.

2. A company wants to keep track of its training programs for employees. Create a new table named `training_programs` with the following structure:

Column Name	Data Type	Constraints
training_id	NUMBER	Primary Key
training_name	VARCHAR2(100)	NOT NULL
trainer_name	VARCHAR2(50)	NOT NULL
duration_days	NUMBER	
start_date	DATE	
fee	NUMBER(8,2)	CHECK (fee >= 0)

Tasks

- Create the `training_programs` table with the specified columns and constraints.
- Insert the following records into the table.

Training ID	Training Name	Trainer Name	Duration (Days)	Start Date	Fee
101	SQL Fundamentals	Alice Johnson	5	10-JUL-2025	8000
102	Database Design	Bob Smith	4	15-JUL-2025	7500
103	PL/SQL Programming	Carol Davis	6	20-JUL-2024	9500

104	Oracle Administration	David Lee	3	25-JUL-2026	7000

- Update the fee of **Database Design** by increasing it by **10%**.
- Change the trainer of **Oracle Administration** to **Emily Brown**.
- Delete the training program with `training_id = 102`.
- Add a new column `mode VARCHAR2(15)` to store whether the training is conducted **Online** or **Offline**.
- Set the mode of all existing training programs to **Online**.

3. Create a table named `it_employees` that contains all employees working in the IT department.

Tasks:

- Create the table with data.
- Add a primary key on `employee_id`.
- Add a column `project_name VARCHAR2(50)`.
- Set the project name of all employees to `'HRMS Upgrade'`.
- Insert one new IT employee.

4. HR wants to store employee bonus information. Create a table named **EMP_BONUS** with columns: BONUS_ID, EMPLOYEE_ID, BONUS_AMOUNT. Ensure that:

- Every bonus belongs to an employee
- The bonus must be provided
- The bonus amount cannot be negative Insert one record into the table

Insert one record into the table.

5. Create a table named `recent_employees` containing employees hired on or after **January 1, 2005**.

Tasks:

- Add a column **`training_status`** `VARCHAR2(20)`.
- Set the training status to `'Pending'`.
- Change the status to `'Completed'` for employees earning more than 10,000.
- Delete employees whose salary is less than 6000.

6. Create a table named `sales_departments` containing only departments whose department name contains the word **Sales**.

Tasks

- Add a primary key.
- Insert one new department.
- Rename the column **`department_name`** to **`dept_name`**.
- Delete the newly inserted department.
